U. S. Department of Agriculture

During the spring of 1951 we decided to grow Pelargoniums in 2½ inch pots instead of 2 inch pots. We made the change in order to produce a larger and better quality plant. Constantly, during the past 37 years, we have striven to offer top quality plants for the florist trade at the lowest possible price. Several thousand satisfied customers is the result of our efforts.

Listed below are the 25 standard varieties and 19 newer varieties of Pelargoniums which we are offering this season.
